SUMMARY

Strong background in data analysis, using Python, SQL, and Power BI to transform raw data into actionable insights. Actively learning through real-world projects and data to solve practical problems with simple, scalable solutions.

AI automation-focused student with hands-on experience building intelligent workflows using n8n, AI tools, and API integrations to automate processes and improve efficiency. Skilled in designing data-driven automation systems that reduce manual work and ensure reliable outputs.

SKILLS

- AI Automation
- Data analytics
- PowerBi
- Workflow Automation (n8n)
- API Integration
- Prompt Engineering
- Python
- SQL (MySQL)
- Excel
- Data Transformation
- AI Tools
- Docker

EXPERIENCE

Skill High

(April 2025-June 2025)

Internship

At my offsite internship, I was concentrating on frontend development and created responsive UIs with HTML, CSS, and JavaScript. I implemented projects such as payment form and homepage layouts, and also aided backend tasks with Node.js for light API handling. This helped me learn full-stack development and how to convert design ideas into actual, working web components.

EHUB IT Web Solutions

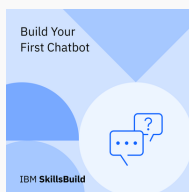

(Jan 2026 – Feb 2026)

Internship

- Problem Solving: Demonstrated strong analytical thinking and technical aptitude by proactively identifying and resolving project roadblocks.
- Project Delivery: Maintained high professional standards and consistently delivered project milestones ahead of strict deadlines.
- Developed automated data analysis workflows that streamlined project delivery, ensuring high-standard professional results through proactive problem-solving and technical aptitude in AI environments.

CERTIFICATES

IBM
Prompt
Engineering

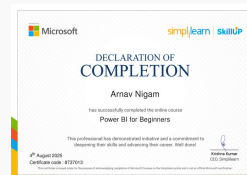

Learned to design effective prompts for large language models, improve AI responses, and apply prompt strategies for automation use cases.

IBM
Introduction
to Large
Language
Models

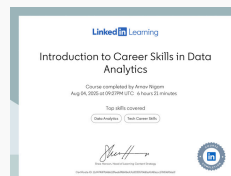

Gained foundational knowledge of LLMs, generative AI concepts, and real-world applications in intelligent systems.

MICROSOFT
Completion Of
Power BI Course

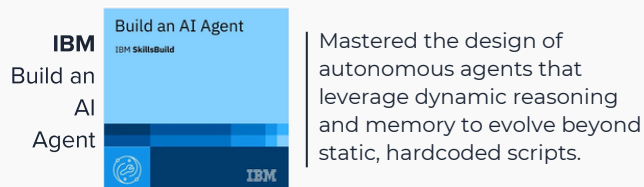

Worked on data transformation, dashboard creation, and interactive data visualization for business decision-making.

LINKEDIN
Introduction to
Career Skills in
Data Analytics

Developed foundational skills in Excel, SQL, data cleaning, Power Query, and data visualization.

EDUCATION

2023-2027 [Now]

Delhi Technical
Campus, GGSIPU

Btech in Computer Science

Studying B.Tech in Computer Science has been a valuable journey for me. I've confidently built several projects and developed strong skills in SQL, DBMS, and Java.

- CGPA: 7.62 (4th Sem)
- CGPA: 7.10 (First Year Average)

Schooling

Bmps, JBM ,Preet
Vihar

10th And 12th

I completed my 10th grade with 82.2% marks, followed by my 12th grade in the Science (Non-Medical) stream with 73%. These years helped me build a strong foundation in science and mathematics, which motivated me to pursue B.Tech in Computer Science.

PROJECTS

Autonomous n8n Data Reporting Engine(N8N)

- Architected an automated n8n workflow that dynamically ingests data from any provided Google Sheets URL to generate instant analytical reports.
- Integrated automated charting logic to visualize spreadsheet data in real-time, reducing manual reporting time by 100% through full-scale automation.

AI Recruitment & Candidate Intelligence Agent(N8N)

- Built an end-to-end Recruitment Agent capable of generating job descriptions and autonomously ranking candidates based on role compatibility.
- Developed an integrated chatbot interface that allows recruiters to query candidate data or conduct conversational screenings using natural language.

Data Analyst(Excel, Power BI & SQL)

- Designed end to end analytics solutions by cleaning, transforming, and modeling automotive sales data using Excel, SQL, and Power BI. Built interactive dashboards with Power Query, DAX, and KPI-driven visualizations to monitor regional sales, inventory turnover, vehicle demand, and dealership performance. Automated reporting workflows to convert raw transactional data into actionable business insights, revenue trends, and operational performance metrics.

Industry Experience:-

- Automotive & Mobility
- Retail & E-Commerce
- Healthcare
- Food & Restaurant Operations
- Fleet & Transportation
- Sales & Revenue Analytics
- Business Intelligence & Reporting
